Version Control

Date	Version	Author(s)	Brief Description of Change
1/13/2020	1.0	Savi Sahni	Initial Draft
4/21/2020	1.1	Shelby Maloney	Added Version Control
2/24/2021	1.2	Prashanth Reddy	Added Provider Client SRI to Required Fields
1/23/2023	1.3	Ram Ganesan	Added Service No Admission Reason Code as Optional Field Updated Admission SRI as Optional Field
2/27/2025	1.4	Ciji Dixon	Changed 'Session Count' Field Name to 'Service Unit' in section 1.3.1.3 to Correspond with the Data Set Code Values for Services.

1 Service Event Data Set

1.1 Submitting Service Event Data

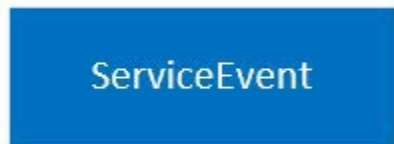

Service Event data must be submitted for all clients served.

Provider Treatment Episode information must already exist in the Data Warehouse before Service Event data can be submitted.

Service Event data should be re-submitted after any part of the Service Event needs to be added, changed, or removed.

1.2 Service Event Domain Diagram

The following diagram depicts the relationships between all objects in the Service Event domain in the Data Warehouse.

1.3 Service Event Entities

This section defines the entities involved in the Service Event data set.

The Service Event data set is used at the state level to collect and report the types and frequency of services provided in provider agencies to specific individuals.

Service Event data set is a critical component for supporting billing and payment processes and for being able to identify how services impacted treatment episode outcomes.

1.3.1 ServiceEvent

1.3.1.1 Description

A Service Event represents a specific treatment encounter for a client with a substance use, mental health, or other disorder, in a provider site as part of their treatment program. A Service Event will be uniquely identified in the Data Warehouse by the combination of the Provider's Source Record Identifier for the Service Event and the Source Record Identifier for the Provider. Providers are required to submit a unique Source Record Identifier for each Service Event within each Provider. Therefore, no two Service Event records can be submitted with the same Service Event Source Record Identifier and Provider Source Record Identifier combination.

1.3.1.2 Key Fields

The fields in this entity that will be used to uniquely identify a record, to determine whether to create or update an existing record, and to delete an existing record are:

Field

Source Record Identifier

Provider Source Record Identifier

1.3.1.3 Fields

The fields in this entity, along with a description and associated validation rules for each are:

Field	Description	Validation Rules
Source Record Identifier	The provider's internal system identifier for the Service Event record.	Data Type Validation
		Data Type Message
		string Failed parsing value to type string
		Length Validation
		Max Length Message
100 Value length must be less than or equal to '100'		
Source Record Identifier		Errors
		Rule Name Message Additional Values in Message
		Source Record Identifier Required Rule Source Record Identifier is required
Source Record Identifier		Guidance
		Note The SourceRecordIdentifier must be a unique identifier for this record in the source system. It must be a value that is unique and never changes. Examples of unique identifiers are Identity, AutoNumber or GUID. If the source system does not have a unique identifier, one can be constructed. A constructed SourceRecordIdentifier might contain the values that make this record unique and never change, separated by a delimiter.
Provider Source Record Identifier	The provider's internal system identifier for the Provider record this Service Event is associated with.	Data Type Validation
		Data Type Message
		string Failed parsing value to type string
Provider Source Record Identifier		Linkage Validation
		Description Required Message
		Must match the Source Record Identifier for a single Provider already set up in the Yes Cannot find matching 'Provider'

Field	Description	Validation Rules		
		Mississippi Data Warehouse		
Episode Source Record Identifier	The provider's internal system identifier for the Provider Treatment Episode record this Service Event is associated with.	Data Type Validation		
		Data Type	Message	
		string	Failed parsing value to type string	
		Linkage Validation		
		Description	Required	Message
		Must match the Source Record Identifier for a single Provider Treatment Episode already set up in the Data Warehouse for the Provider identified by the Service Event's Provider Source Record Identifier	Yes	Cannot find matching 'ProviderTreatmentEpisode' OR Cannot find matching 'ProviderTreatmentEpisode' because cannot find matching parent 'Provider'
Admission Source Record Identifier	The provider's internal system identifier for the Admission this Service Event is associated with.	Data Type Validation		
		Data Type	Message	
		string	Failed parsing value to type string	
		Linkage Validation		
		Description	Required	Message
		Must match the Source Record Identifier for a single Admission already set up in the Data Warehouse for the Provider identified by the Service Event's Provider Source Record Identifier and for the Provider Treatment Episode identified by the Service Event's Episode Source Record Identifier	Yes	Cannot find matching 'Admission' OR Cannot find matching 'Admission' because cannot find matching parent 'ProviderTreatmentEpisode'
Errors				
		Rule Name	Message	Additional Values in Message
		Admission Source Record Identifier Is Required If Service Code Does Not Allow Service Event Without Admission Rule.	Admission Source Record Identifier is required if Service Code has a property of Allow Service Event Without Admission = 'FALSE'.	

Field	Description	Validation Rules										
		<p>Guidance</p> <p>Note</p> <p>Optional. Admission Source Record Identifier is not required if the Service Code has Property of Allow Service Event Without Admission = 'TRUE'. Linkage Validation will only be required if a valid Admission Source Record Identifier is provided.</p>										
<p>Provider Client Source Record Identifier</p>	<p>The provider's internal system identifier for the Provider Client record this Service Event is associated with.</p>	<p>Data Type Validation</p> <table border="1"> <thead> <tr> <th data-bbox="669 461 863 509">Data Type</th> <th data-bbox="863 461 1980 509">Message</th> </tr> </thead> <tbody> <tr> <td data-bbox="669 509 863 558">string</td> <td data-bbox="863 509 1980 558">Failed parsing value to type string</td> </tr> </tbody> </table> <p>Errors</p> <table border="1"> <thead> <tr> <th data-bbox="669 651 1150 699">Rule Name</th> <th data-bbox="1150 651 1629 699">Message</th> <th data-bbox="1629 651 1980 699">Additional Values in Message</th> </tr> </thead> <tbody> <tr> <td data-bbox="669 699 1150 878">The Provider Client Source Record Identifier In The Service Event Should Match With The Provider Client Source Record Identifier Present In Treatment Episode Rule.</td> <td data-bbox="1150 699 1629 878">The Provider Client Source Record Identifier in the Service Event should match with the Provider Client Source Record Identifier present in Treatment Episode.</td> <td data-bbox="1629 699 1980 878"></td> </tr> </tbody> </table> <p>Guidance</p> <p>Note</p> <p>Optional</p>	Data Type	Message	string	Failed parsing value to type string	Rule Name	Message	Additional Values in Message	The Provider Client Source Record Identifier In The Service Event Should Match With The Provider Client Source Record Identifier Present In Treatment Episode Rule.	The Provider Client Source Record Identifier in the Service Event should match with the Provider Client Source Record Identifier present in Treatment Episode.	
Data Type	Message											
string	Failed parsing value to type string											
Rule Name	Message	Additional Values in Message										
The Provider Client Source Record Identifier In The Service Event Should Match With The Provider Client Source Record Identifier Present In Treatment Episode Rule.	The Provider Client Source Record Identifier in the Service Event should match with the Provider Client Source Record Identifier present in Treatment Episode.											
<p>Service Code</p>	<p>The code indicating the service that is being provided to the client.</p>	<p>Data Type Validation</p> <table border="1"> <thead> <tr> <th data-bbox="669 1122 863 1170">Data Type</th> <th data-bbox="863 1122 1980 1170">Message</th> </tr> </thead> <tbody> <tr> <td data-bbox="669 1170 863 1219">string</td> <td data-bbox="863 1170 1980 1219">Failed parsing value to type string</td> </tr> </tbody> </table> <p>Vocabulary Validation</p> <table border="1"> <thead> <tr> <th data-bbox="669 1308 1247 1357">Rule</th> <th data-bbox="1247 1308 1980 1357">Message</th> </tr> </thead> <tbody> <tr> <td data-bbox="669 1357 1247 1438">Must be a valid Vocabulary value from the Mississippi Code System, for the Service Value Set</td> <td data-bbox="1247 1357 1980 1438">Unknown code for type 'Service'</td> </tr> </tbody> </table>	Data Type	Message	string	Failed parsing value to type string	Rule	Message	Must be a valid Vocabulary value from the Mississippi Code System, for the Service Value Set	Unknown code for type 'Service'		
Data Type	Message
